Стальное горизонтальное соединение

Cupboard scaffolding system is a safe scaffolding system with its elements suitably designed with the standards and easy installation and low cost where four horizontal connection is connected to main carrier post in a single nodal point with a single movement of horizontal connection. Locking of elements to nodal points is enabled via an element described as lower cup fixed with joint welding method to main post and an element called upper cup freely moving on axial manner over main post. Locking of the system is enabled in such a manner that welded elements at the end of horizontal connections are respectively arranged within lower cup and are supporting one another by completing a circle of 360 degrees and upper cup is sealed and compressed over these elements. Thanks to the design of this lower cup and upper cup in hollow hemisphere form playing a role in locking of horizontal connections, this system is also called as cup lock or glass lock in international literature.

With the capability of 4 horizontal connections from each direction in the same nodal point to a post, this system can be used as a load scaffold for providing support to flooring molds and in facade works and industrial facility maintenance and repair works. That different functional systems are formed with standard elements makes this scaffolding system to be more preferable.

Installation and dismantling of the system formed with only post, horizontal connection, toe and adjusting screws in facade works are quite practical. A rigid structure is formed with tightly locking of lock nodal points and this makes system highly safer. Wider working platform can be formed by using horizontal branches in different measurements or volumetric installation can also be performed in this system with connection of several posts to one another in horizontal connections. Allowing easier installation in different ground types and elevation levels with post elements in different measurements and adjustable leg elements, this system offers ergonomic solutions in the facade works.

One of the cupboard scaffolding system is that it can be used as a formwork scaffold. Preferred because of formwork works of the structures constructed for a wide range of uses such as housing, hotel, airport, hospital, shopping mall, bridge-viaduct, this system can be used below the formwork by forming independent towers by interconnection of the posts in certain number with horizontal branches and can be used by performing a volumetric installation below flooring formwork by interconnection of several posts. Balanced distribution of flooring loads to formwork scaffolding can be achieved. Precise height adjustment can be made with adjustable elements below and above the posts and high quality concrete surfaces can be achieved with smooth surface formwork materials.

Müşterilerimizin ihtiyaçları doğrultusunda projelerinde teorik ve uygulamalı olarak eğitmenlerimiz tarafından eğitimler verilmektedir. Bu eğitim kapsamında projelerinde kullanılacak ürünlerin iş güvenliği kriterlerine uygunluğu ile birlikte teknik özellikleri, kullanım sistemi ve standartlara uygunluğu hakkında proje sorumlularına detaylıca bilgi verilmektedir.

Theoretical and practical trainings are provided by our trainers in line with the needs of our customers. Project supervisors are provided with detailed information regarding compliance of the products to be used in the projects within the scope of this training with occupational safety, technical specifications, utilization system and standards.

يتم تقديم خدمات التدريب العملية والنظرية من قبل مدربينا في المشاريع حسب احتياجات العملاء. يتم في نظام البرنامج التعليمي تقديم المعلومات المفصلة إلى مسؤولي المشروع بخصوص المستلزمات التي ستستخدم في المشاريع والالتزام بمعايير السلامة في

В соответствии с потребностями наших клиентов, наши преподаватели проводят курсы подготовки в теоретических и практических проектах. В рамках этих курсов подготовки, вместе критериями безопасности труда в отношении используемой в проектах продукции, лицам, несущим ответственность за проект, предоставляется подробная информация о технических характеристиках, применении системы и соответствии стандартам.

Yapeksan proje birimi, müşteri projelerine göre uygun olan iskele sistemini belirlemekte ve mimari projelerine göre iskele yerleşimini yapmaktadır.

Yapeksan project department identifies scaffolding systems suitable for customer projects and performs scaffolding placement based on architectural projects.

كما يقوم وحدة مشاريع ييكسان بتحديد نظام السقالة المناسب حسب مشروع العميل و تثبيت السقالة حسب المشاريع المعمارية.

Проектный отдел Yapeksan, в соответствии с проектом клиента определяет самую подходящую систему строительных лесов и размещает строительные леса в соответствии с архитектурным проектом.

Üretimini yaptığımız sistemlerin stoktan satışını yaparak müşterilerine hızlı çözümler sunmaktayız. Ürünler, standart miktarlarda, marka etiketli, paketli, ambalajlanmış ve güvenli olarak müşterilere sevk edilmektedir.

We offer quick solutions to our customers by making sales of our systems from stocks. Products are shipped in standard quantities with brand label, package in a safe manner.

إننا نقدم الحلول السريعة إلى عملائنا الأعزاء من خلال بيع الأنظمة التي نقوم بانتاجها من المخزون. يتم شحن المنتجات بشكل مغلف ومصلق العلامة التجارية وبالكمية المعيارية بشكل أمن إلى الزبائن.

Продавая со складов системы, которые мы выпускаем, мы предлагаем клиентам быстрые решения. Продукция отправляется клиентам надёжным способом, в стандартном количестве, с этикеткой торгового бренда, упакованная в пакеты.

Yapeksan, geniş ürün stoku ile müşterilerine hızlı ve esnek çözümler sunmaktadır. Yapeksan, kiralama hizmeti ile uzun süreli projelerde, depolama, bakım, onarım ve yatırım maliyeti gerektirmeden müşterilerine avantajlı çözümler sunmaktadır.

Yapeksan offers quick and flexible solutions to its customers with a wide range of stocks. With its leasing service, Yapeksan offers advantageous solutions to its customers without any need of storage, maintenance, repair and investment costs in long-term projects.

يقدم يبيكسان بمخزون منتجاتها الواسعة الحلول السريعة والمرنة إلى عملائها الأعزاء. كما ويقوم يبيكسان بتقديم الحلول المميزة إلى عملائها الأعزاء بواسطـة خدمة التأجير دون تكاليف تخزين وصيانة وتصليح وأستثمار في المشاريع الطويلة الأجلـ.

Yapeksan, с обширным запасом готовой продукции, предлагает клиентам быстрые и гибкие решения. Yapeksan, оказывая арендные услуги, для долгосрочных проектов предлагает клиентам выгодные решения, не требующие наличия складов, выполнения обслуживания и вложения средств.
